MODEL SMARTBED

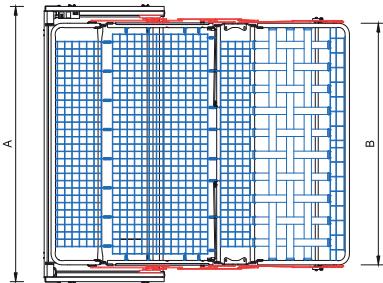

INTERNATIONAL PATENT
APPLICATION PENDING

Smartbed is the first, innovative mechanism for sofa beds with a fully automatic opening mechanism. It has been tested for 8000 opening and closing cycles with a weight of over 1000kg and CATAS certification. Indeed, the sofa is turned into a bed by activating a simple handcontrol, perfectly solving the need to have a sofa-bed without having to make any effort to open it and close it. This model can take a 12 cm polyurethane mattress of 202 cm long. The frame is supplied with bayonet connections that let you disassemble the sofa and move it.

A push-button panel allows you to unfold and fold back the sofabed. While converting from sofa to bed and vice versa, it is possible to change direction. Releasing the button stops the mechanism for security reason. While unfolding and folding the sofabed a short beep every 2 seconds will warn you that the mechanism is in motion. Once it is folded, a long beep will warn you that the sofa or bed is ready to use.

Le misure dei materassi sono nominali

Smartbed è il primo e innovativo meccanismo per divano-letto ad apertura completamente automatica. Infatti, la trasformazione da divano a letto, avviene azionando una semplice pulsantiera, risolvendo al meglio l'esigenza di avere un divano-letto senza dover compiere alcuno sforzo per l'apertura e la chiusura.

Questo modello, può prevedere l'inserimento di un materasso in poliuretano da 12 cm, per una lunghezza di 202 cm.

Il telaio viene fornito di attacchi a baionetta che rendono il divano smontabile e trasportabile. Apertura e chiusura sono attivabili tramite telecomando.
